PRELIMINARY

Problems epidemic as if not visit over . The emergence of Corona Virus Disease 2019 or Covid-19 is not quaint disconnect eye chain spread of other viruses. it precisely resulted appearance a number of variant new Covid-19. Various news related to Covid-19 together walk time caused on news other issues . Like issue political , social, to religious . By because that is news always related to Covid-19 placed as information main in every medium. one news pulling on the sidelines the spread of Covid-19 viz appearance Epidemic Hepatitis. Mysterious Hepatitis Becomes problem world globally when this , case first found in the United Kingdom April 5, 2022 later spread across the continents Europe, America and Asia, wrong only Indonesia (Yanti & Setiawan, 2022) . The issue of acute hepatitis that attacks heart Becomes wrong one issue health moment this is in Indonesia. Heart is functioning digestive organs secrete bile, save glycogen detoxification, excretion, and arrange protein and fat metabolism and carbohydrate (Jisip & July, 2022). Hepatitis causes disease heart with period related length happy cirrhosis, and cancer heavy heart. Hepatitis have symptom like extrahepatic like cryoglobulinemia, osteoadenitis and porphyria skin (Zheng et al., 2022) .

Found case suspected acute hepatitis the most mysterious in Jakarta as many as 12 people. Case the most attack children 5-9 years old. A number of researcher called acute hepatitis caused by adenovirus. Head Center Research Medical Preclinic and Clinical Body Research and Innovation National Agency (BRIN) explained that adenovirus is types of viruses that can cause sick from light until heavy , usually the virus known as causative pathogen infection self limited. The adenovirus spreads from person to person and generally cause disease channel breathing (Niswah, 2022) . Hepatitis is condition inflammation caused heart by infection, disorder autoimmune , material chemicals, drugs, alcohol, to abnormality genetics certain . Hepatitis can appear in a manner suddenly then gone (acute), or could also be condition period trigger length damage progressive (chronic) liver disease. As for cases of hepatitis that occurred moment this is condition I because attack previous children healthy in a manner suddenly and symptomatic bad . However, this hepatitis said to be ' mysterious' by a number expert because different with hepatitis already there. Although its nature raises damage heart , however the cause until moment this still mysterious. In fact , results from inspection laboratory on a number kid outside country, several negative for hepatitis A, B, C, D and E (H.Pudjiadi et al., 2022)

METHOD

Activity devotion Public this located at SMP Al Bayan Makassar, activities this form education in form counseling using leaflets, lectures and ask answer , on Student class 2 and 3 SMP Al Bayan Makassar. Amount Students who follow activity is 58 people.
