INTRODUCTION

Caused non-natural disasters by *Coronas Virus* or *Covid-19* has impact increasing total victim and loss treasure object, extent scope affected area disaster, as well raises how implication on aspect social economy extensive in Indonesia. In normal situation, death Mother and neonatal mortality in Indonesia still Becomes challenge big, moreover on moment situation disaster. Moment this, Indonesia is face disaster non-nature national *Covid-19* so that service maternal and neonatal health to be wrong one affected services impact good in a manner access nor quality (group Task *Covid-19*, 2020).

Baby New Born own risk disturbance highest health, various problem health can appears. So that without handling which right, normal fatal. Factor reason death babies in Indonesia based on results Research Health Basic (Rikesdas) shows that, cause death the most on group baby 0-6 domination by disorder / disorder respiration (35.9%), prematurity (32.4%) and sepsis (12%). In another party factor contributing mother to born dead and death baby aged 0-6 day is Maternal Hypertension (23.6%), complications pregnancy and birth (17.5%), amniotic fluid broken early and antepartum hemorrhage respectively (12.5%). Reason main death baby on group 7-28 day ie Sepsis (20.5%), malformations congenital (18.1%) and pneumoniae (15.4%). And causes main death baby on group 29 days-11 months that is Diarrhea (31.4%), pneumonia (23.8) and meningitis/ encephalitis (9.3%), whereas KN coverage 1: 77.31% (Ministry of Health, 2015).

Attempts made government for reduce IMR between other such as : 1) Increase Service Neonatal health, ie with requires that every baby new born get service Neonatal visits at least 3 times (KN1, KN2 and KN3) are appropriate standard. 2) Neonatal care with abnormality or complications / Emergency corresponding standard power which health service between other as Management Integrated Baby Young (MTBM), Management Asphyxia Baby New Born, Management Baby Heavy Born Low (Ministry of Health, 2015).

Exclusive Breastfeeding is food experience first for baby and provide all vitamins, nutrients and necessary minerals baby for growth six month first. Not there is fluid or food what else is needed, continue to breastfeed available until half or more from need. Besides That is, breast milk contains antibody from helpful mother combat disease. Inside breast milk total enough is food best for baby and could fulfil need nutrition During six month first (Josef, 2011). Asi is food main and most perfect for baby. Where does breast milk contain almost all substance nutrition with composition corresponding with need baby for grow and develop optimally (Pollard, 2016).

Manager Center Bond Doctor Indonesian Children (PP-IDAI) recommends about gift immunization in the middle Pandemic *Covid-19*, immunization must permanent given corresponding with timetable from ages 0 – 18 months. Ministry health has Secrete guide about gift Immunization Routine complete consisting from immunization base and continued. With timetable as following : 1) Baby aged not enough than 24 hours given Hepatitis B immunization (HB-0), 2) 1 month old given

(BCG and Polio 1), 3) Age 2 months given (DPT-HB- Hib 1 and Polio 2), 4) Age 3 months given (DPT-HB- Hib 2 and Polio 3), 5) Age 4 months given (DPT-HB- Hib 3, Polio 4 and IPV or injecting Polio), and 6) Age 9 months given (Measles or MR). For immunization continued : 1) baby lower two years (Baduta) aged 18 months get DPT-HB- Hib immunization and Measles /MR, 2) Grade 1 SD/Madrasah/ equivalent get DT immunization and Measles /MR, 3) Grades 2 and 5 SD/Madrasah/ equivalent get TT immunization .

order mother and baby permanent could always get care continuous During period pandemic , then as power health especially midwife could conducted care sustainable midwifery (*Continuity of care*) on Mother and family . On period pandemic this power health must more innovative in carry out care to family , however permanent must notice protocol health related *Covid-19* in give care on Mother and baby . in (Bustami , 2021).
